Candidate's Name: _____

Candidate's Signature: _____

District ID:

--	--	--	--

Read the following instructions carefully:

1. Do not write your **school** and **district** name anywhere on this paper.
2. This paper has two sections: **A** and **B**.
Section **A** has **20** questions and Section **B** has **12** questions. The paper has **15 printed pages** altogether
3. Answer **all** questions. **All** the working for both sections **A** and **B** must be shown in the spaces provided.
4. **All** working must be done using a **blue** or **black** ball point pen or ink. Any work done in pencil other than graphs and diagrams will **not** be marked.
5. **No calculators** are allowed in the examination room.
6. Unnecessary **changes** in your work and handwriting that cannot easily be read may lead to loss of marks.
7. Do not fill anything in the table indicated: **"For Examiners' Use only"** and boxes inside the question paper.

SECTION A (40 MARKS)

1. Workout:

$$\begin{array}{r} 7 \quad 6 \\ - 2 \quad 2 \\ \hline \end{array}$$

2. Write "Two thousand twenty six" in figures.

3. Simplify: $9 - 4$

4. Describe the unshaded region in the diagram below

5. Complete the pattern below

2, 3, 5, 8, 13, _____

6. Express $66\frac{2}{3}\%$ as a ratio.

7. In a P.6 class of 48 pupils at St. Yvone P/s, there are 20 girls and the rest are boys. Express the number of boys using tallies

8. Tell the afternoon time shown on the clock face below

9. Given that $M = \frac{1}{4}$, $P = \frac{2}{3}$. Find the value of $\frac{P}{M}$ in its simplest form.

10. In the figure below, find the value of K.

11. In a trading centre, the road is 4metres wide. Mary makes strides of 80cm. How many strides did she make to cross the busy road?

12. Solve: $4 - m = 7$

13. James paid shs. 40,000 for a shirt after being offered a discount of 20%. Find the cost price of the shirt before the discount.

14. The bearing of Town A from Town B is 060° . Find the direction of Town B from Town A. (use a sketch diagram).

15. Musa is 4 years older than John. Find their mean age if Musa is 18 years old.

16. Divide $\frac{1}{4}$ by $\frac{1}{2}$, using lowest common multiple.

17. Simplify: $3(p - 2) - (p + 4)$.

18. Term three of a certain year started on Monday 6th September and ended on 2nd December the same year. On which day of the week did the term end?

19. Round off 6237 to the nearest hundreds using a numberline.

20. Using a sharp pencil, ruler and a pair of compass only, construct an angle of 135° in the space below.

SECTION: B

21. At a party attended by 50 guests, 20 guests ate Matooke (M), K guests ate both Matooke and Rice (R) while 10 guest ate other food stuffs. The number of guests who ate both Rice and Matooke was a half of those who ate Rice only.

(a) Use the above information to complete the Venn diagram below.

- (b) Find the number of guest who ate both Matooke and Rice.

(2Mks)

- (c) Workout the probability of choosing a guest at random for a closing prayer who ate Rice

(1Mk)

22. Donald was given sh 150,000 by his father and went for shopping. He bought the following items.
- 2 Dozen of books at Sh. 4000 for 3 books
 - A score of pencils of sh 200 per pencil.
 - $2\frac{1}{2}$ litres of cooking oil at Sh 20,000
 - A 50kg bag of Rice at Sh. 70,000 per bag
- (a) Calculate Donald's expenditure on all items.

(3Mks)

- (b) If he was a transport fare of Shs 4000, how much money did he take back to his father?

(2Mks)

23. In the diagram below, the length of arc AB = 44mm. Find the area of the figure ABC.
(take π as $\frac{22}{7}$)

(5Mks)

24. The sum of 3 consecutive even numbers is 36.
 (a) If the largest number is p , find the value of p

(2Mks)

- (b) Find the product of the first and second numbers.

(3Mks)

25. Study the numberline below carefully and use it to answer questions that follow.

- (a) Write the integers represented by the arrows.

(1 Mk @)

W _____

X _____

Y _____

- (b) Use the integers in (a) above to write down the mathematical sentence for the above numberline.

(2Mks)

26. (a) A fifty minute meeting at state house started at 11:40pm. Express the time it ended in 24 hour (3Mks)

(b) Express 20 minutes in degrees (2Mks)

27. In a clan, $\frac{2}{5}$ of the members are children $\frac{1}{3}$ are women and a quarter of the remainder are men. If there are 15 men, calculate the total population of the clan. (5Mks)

28. (a) Follow the instructions below to construct a quadrilateral WXYZ.
Construct line $WX = 8\text{cm}$. construct an angle of 120° at point W.
Construct line $XY = 5\text{cm}$

(4Mks)

- (b) Construct a perpendicular bisector from point Z to meet the extension of line WX at point A.

(1Mk)

29. A parent gave out Shs. 270,000 to his children as pocket money such that Mulungi receives $\frac{2}{3}$ of Babirye's share while Babirye received $\frac{3}{4}$ of Chrispus' share. How much money did each child receive?

(5Mks)

30. (a) Workout:

$$\begin{array}{r} 2002_{\text{three}} \\ - 221_{\text{three}} \\ \hline \end{array}$$

(2Mks)

(b) Give that $y12_{\text{five}} = 1223_{\text{four}}$ calculate the value of y

(3Mks)

31 (a) Simplify:

$$15 \div 3 - 4 + 7 \times 6$$

(2Mks)

(b) A lorry full of sugarcane weighs 20.5 tonnes. An empty Lorry weighs 5.5 tonne.

One day, a farmer bought a lorry of sugarcane when $\frac{2}{3}$ full at shs. 120,000 per tonne. How much money did he pay for the sugarcane?

(3Mks)

32. The graph below shows pupils who were absent in a P.5 class of 36 pupils at Gumite P/s. Study it carefully and answer questions that follow.

(a) Which day had the highest attendance?

(1Mk)

(b) How many more pupils were present on Monday than Wednesday?
(3Mks)

(c) Which days had the same attendance?

(1Mk)

*****END*****
